

```
import PropTypes from 'prop-types';

MyComponent.propTypes = {
  // Anything that can be rendered
  optionalNode: PropTypes.node,

  // A React element.
  optionalElement: PropTypes.element,

  // Declare that a prop is an instance of a class
  optionalMessage: PropTypes.instanceOf(Message),
};
```

```
import PropTypes from 'prop-types';

MyComponent.propTypes = {
  // Prop is an enumerable type
  optionalEnum: PropTypes.oneOf(['News', 'Photos']),

  // An object that could be one of many types
  optionalUnion: PropTypes.oneOfType([
    PropTypes.string,
    PropTypes.number,
    PropTypes.instanceOf(Message)
  ]),
};
```
